

JRE (Java runtime) Installation guide

Note:- Always use latest version of java and update it time to time.

1. Go to <http://java.com>

The screenshot shows the Java website (java.com) in a web browser. The browser's address bar displays "java.com/en/". The website has a red header with the Java logo and a search bar. Below the header, the main content area features the text "JAVA + YOU, DOWNLOAD TODAY!" and a prominent red button labeled "Free Java Download". A speech bubble with a green border and a pointer to the button contains the text "Click 'Free Java Download' Button". To the right of the text is an image of a woman lying on her stomach, using a laptop. Below the main content, there are links for "What is Java?", "Do I have Java?", and "Need Help?". At the bottom, there is a section titled "About Java" with several tiles for "JavaOne", "Alice", "Greenfoot", "BlueJ", "Oracle Academy", and "Java Magazine". The Windows taskbar is visible at the very bottom of the image.

Verify Java Version

Check to ensure that you have the recommended version of Java installed for your operating system.

Verifying your Java version will only work in Desktop mode on Windows 8 and Windows 8.1. See the [Java on Windows 8 FAQ](#) for more detailed information.

Verify Java version

If you recently completed your Java software installation, **restart your browser** (close all browser windows and re-open) to **enable the newly installed Java version** in the browser. Javascript must also be enabled.

Verifying Installation

Detecting Java on your computer

This plugin is vulnerable and should be updated.
[Activate Java.](#)
[Check for updates...](#)

The Java detection app will ask for permission to run. Click **Run** to allow the verification process to continue.
Depending on your system settings, you may need to respond to prompts to allow the verification to continue.

If you have installed Java and there is an error with the verification, there could be a configuration issue (eg. browser, Java control panel, security settings) or the Java plug-in is blocked by the browser.
» [See the troubleshooting FAQ](#)

 If you recently completed your Java software installation, **restart your browser** (close all browser windows and re-open) to **enable the newly installed Java version** in the browser. Javascript must also be enabled.
